The Rifton Tricycle

The features of this therapeutic trike have been carefully considered to help make it as functional and fun as possible.

The therapeutic benefits of cycling on The Rifton Tricycle:

- Lower extremity strengthening
- Reciprocal leg motion patterning
- Balancing skills
- Using visual, spatial perception for steering
- Social interaction with peers and neighbours

Upper Limb Splints

As an occupational therapist with over 20 years' experience in paediatrics, I provide specialised and custom made upper limb splints. These are made from comfortable materials and are ideal for lengthening or maintaining muscle length as well as following Botox injections. My communication with your child's treating therapist is essential to ensure the same treatment goals are being met.
