

# Special Kids: Products on Review

## April 2019

### Load Assisted Gait Trainer

**Body Weight Supported Rehabilitation**  
If a patient has their weight supported then they can do more repetitions. Repetitions are the key, especially in the early stages of strengthening skill and ability.

**The Rifton Gait Trainer** has a scale built in to it to allow the therapist to see and record what weight they are taking for the client. The therapist also benefits as they are not doing any lifting.

### Car Seats for Special Needs Children

**Kidslover Car Seat** is fully adjustable special seating for use in vehicles. Available in three sizes with excellent postural support options and tilt function.

Slimline seat cushions allow more space and headroom inside the car. Suitable for fitment to most car types, the passenger is secured by the existing 3-point safety belt fitted in the rear seat. Available with a range of options and adjustments, allowing complete comfort and postural management for your child, including footrests, lateral supports, shoulder supports, pommel, head supports etc.
