Seating Solutions For Complex Needs

The X:panda is a multi-adjustable dynamic seat, with dynamic back, back recline, multi-adjustability and growth. **The x:panda** was developed with particular attention to the articulation of the backrest relative to the seat. The goal being to create a seating system that moves in harmony with the body.

The X:panda is a highly adaptable modular seating system that can be configured to meet a range of postural requirements and to accommodate individual growth in width, depth and back height extend the life of the seat and accommodate a wide range of sizes.
