Body Positioning Harnesses and Belts

Whether you're a therapist or caregiver, we all recognize that positioning can have a big impact on the well-being and livelihoods of children using wheelchairs.

Bodypoint produce a range of body positioning harnesses and belts for wheelchair users for upper body support, lower body and pelvis.

All Bodypoint belts are constructed with an exclusive webbing that is washable and stain resistant for a long performance life.

The Happy Strap - A Solution for Hypotonia

The Happy Strap has been designed as an aid for infants and children with hypotonia (low muscle tone) to assist the control of ligament laxity and joint flexibility in the hips.

A degree of stability is given to the hips by The Happy Strap and this greatly assists in stabilising little bodies and helping them through their developmental milestones of sitting, crawling and walking.
