

# Special Kids: Products on Review

## August 2021

### Hoist for Heavy or Older Kids

A hoist provides a way to transfer somebody with limited mobility without putting unnecessary strain on the carer or the person being moved.

**The Luna Overhead Hoist** from Ergolet with its unique spherical shape and excellent functional features, is a true example of innovative Danish design. Combine Luna with our extensive programme of ceiling and wall mounted tracks including to single layer plasterboard, and you have an overhead lift system providing complete solutions to meet all your requirements. Ideal for home or school.

### Assistive Technology Experts

We are the parents of two amazing and brilliant square pegs, who are trying to make sense of a round world that was not designed with them in mind. So, we have created a collection of tools and resources that helped them to manage their day-to-day life and made it available to everyone else - for parents, facilitators and teachers of children on the Autism Spectrum.
