Dynamic Seating

Netti Dynamic System is an advanced mobility aid for children affected by dystonia with extension movements resulting in very strong spasms and contractions which can cause joint dislocations and challenge the strength of the wheelchair.

After a spasm the user returns to his or her original sitting position securing a good position and pressure distribution.

The user will have less discomfort during spasm as the wheelchair supports the movement.

Protect your child's tablet

Tabtoob is made from a soft yet tough material. The ultra lightweight Tabtoob case is the ultimate protection for your iPad. It has a foam material design & reinforced corners. Tabtoob's design keeps your screen protected and crack free!

Tabtoob can also be used with its integrated stand in both portrait & landscape mode. The stand also doubles as a screen protector.

It is great for kids with special needs - you dont need to worry anymore about kids dropping the iPad, kids at school, going on holidays etc.
