## Sensory Integration Products

Comfort Creatures  
[www.comfortcreatures.co.za](http://www.comfortcreatures.co.za)

We supply a small range of specific products that assist with sensory integration.

It all started with a Sensory Integration trained Occupational Therapist, an anxious boy and a stuffed dog named Spot. Spot is now covered in patches, has been through the washing machine on various occasions but remains a loyal companion and an excellent co-regulator. From there the range grew and more products have been added over time.

## Posture Support Buggie

**The Madiba2Go** is the latest addition to our range of kids posture support buggies. It's foldable off-road base frame carries a modern modular seating system that can easily be adapted on-site to suit the postural needs of mild to intermediate users.

Shonaquip buggies are specialized wheelchairs designed to provide full body and head support for individuals who cannot sit independently and need more support than conventional wheelchairs offer.
